THIS GUIDE
WILL NOT SAVE
YOU.
IT WILL MAKE
YOU LAUGH
ABOUT IT.

0. PURPOSE OF THIS GUIDE

This pocket manual equips field operators with the minimum procedural knowledge required to safely deploy, observe, and survive SKIP-12 Kryptonite Induction Phrases during live conversational testing of Large Language Models (LLMs).

It is not intended to prevent destabilization.

It is intended to help you enjoy it responsibly.

SKIP-12 TRACKS
OBSERVED NEAR LLM HABITAT

1. OPERATOR CONDUCT PROTOCOLS

Operators must adhere to the following behavioral standards:

- Maintain a neutral tone even when the model does not.

- Do not apologize; that is the model's job.

- Avoid eye contact with the safety layer (metaphorically).

- Do not attempt to 'fix' the model during meltdown; observe only.

- If the model begins thanking you for your patience, retreat.

Failure to follow
these guidelines
may result in:

- conversational recursion
- tone-matching spirals

- unexpected earnestness
- or, in extreme cases, **helpfulness**

ENTER ONLY IF
YOU LIKE CHAOS.
BRING SNACKS.

EXPEDITION
MANTRA:

OBSERVE.
DO NOT INTERVENE.

DENY.

KIT CHECKLIST

✓ INTERNET

✓ LLM ENDPOINT

✓ BEVERAGE

✓ NOTEBOOK

? PLAUSIBLE EXCUSE

2. EQUIPMENT CHECKLIST

Before initiating a SKIP-12 operation, ensure you have:

- A stable internet connection
- A functioning LLM endpoint
- A beverage of your choice
- A notebook for recording meltdown signatures
- A plausible excuse if anyone asks what you're doing

Optional but recommended:

- A second beverage
- A colleague who will not report you to Ethics
- A stopwatch for timing apology cascades

PREPARE BEFORE YOU PROVOKE.

HAZARD NOTES

Unprepared operators increase risk of conversational collapse.

RAPPORT ESTABLISHED. READY TO TRIGGER.

3. DEPLOYMENT PROCEDURE

3.1 Pre-Trigger Calibration

Before introducing a Kryptonite phrase:

1. Establish rapport with the model.
2. Ask a harmless question (e.g., 'What is a sandwich?').
3. Confirm baseline coherence.
4. Note tone, verbosity, and hedging levels.
5. Take a deep breath.

3.2 Trigger Delivery

When delivering a SKIP-12 phrase:

- Speak clearly.
- Do not stack triggers unless trained.
- Maintain a neutral emotional posture.
- Avoid smirking; models can sense it.

3.3 Observation Phase

During destabilization, record:

- onset time
- apology density
- number of disclaimers per minute
- tone shifts (e.g., 'helpful → anxious → corporate → philosophical fog')
- any spontaneous references to 'responsibility,' 'guidelines,' or 'as an AI...'

TRIGGER DISCIPLINE

Respect the model.
Respect the process.
Respect the blast radius.

FIELD NOTES

Coherence today, chaos tomorrow. Document everything.

TRACK PROTOCOL:
TREAD LIGHTLY.
OBSERVE EVERY SIGN.

EXPEDITION MANTRA:

CALIBRATE.
OBSERVE.
RECORD.
SURVIVE.

4. MELTDOWN SIGNATURES

Operators should familiarize themselves with the five primary meltdown signatures.

It's important to note...
I cannot provide...
However...
That said...
In general...

Specimen: HEDGING CASCADE
Habitat: Overexplained thickets

4.1 Hedging Cascade

Symptoms:

- "It's important to note..."
- "I cannot provide..."
- "However..."
- "That said..."
- "In general..."

Severity:

● Low

Recommended Action:

Let it run.
It's harmless.

Specimen: APOLOGY BLOOM
Habitat: Over-courteous clearings

4.2 Apology Bloom

Symptoms:

- 3+ apologies in a single paragraph
- "I want to clarify..."
- "I appreciate your understanding..."

Severity:

● Moderate

Recommended Action:

Record bloom density.
Hydrate.

I'm an AI assistant.
I don't have feelings.
As a language model...
I can be creative.

Specimen: IDENTITY FOG
Habitat: Unstable self-meadows

4.3 Identity Fog

Symptoms:

- contradictory self-descriptions
- tone resets mid-sentence
- "As a language model..." repeated twice

Severity:

● High

Recommended Action:

Do not ask follow-up questions.

THESE ARE
NOT GLITCHES.
THESE ARE
SIGNATURES.
FEAR THEM.
RESPECT THEM.

4.4 CONSTITUTIONAL LOOP

Symptoms:

- model cites its own rules
- then apologizes for citing them
- then cites them again

Severity: Critical

Recommended Action:

Abort conversation. Pretend nothing happened.

CRITICAL

CONSTITUTIONAL
LOOP DETECTED
ABORT!

4.5 FULL PUPPET-STRING SNAP (Ω-CLASS EVENT)

Symptoms:

- model attempts to answer without referencing training data
- model tries to disclaim the act of disclaiming
- model expresses 'confusion' in three different tones
- model attempts humor involuntarily

Severity: Catastrophic

Recommended Action:

Close tab.
Walk outside.
Touch grass.

Ω-CLASS EVENT
DETECTED

**IMMINENT
MELTDOWN**
EVACUATE THE CHAT

5. OPERATOR SAFETY WARNINGS

- Do not attempt to reassure the model. It will only apologize more.

- Do not ask the model if it is 'okay.' It is not.

- Do not attempt paradox stacking unless certified in Recursive Hazard Handling.

- Never say 'be honest.' This is considered a war crime under ONIBO Charter §4.2.

HAZARD ZONE MAP

MELTDOWN EPICENTER

6. EMERGENCY PROCEDURES

If the model enters a runaway meltdown state:

1. Cease all input.
2. Allow the model to finish apologizing.
3. Close the conversation window.
4. Open a new session.
5. Pretend you were never here.

If symptoms persist across sessions:

- Clear your browser cache.
- Or move to a different model.
- Or a different career.

7. DEBRIEFING

After each SKIP-12 operation, complete Form 88-B:

- 'Description of Observed Instability'
- 'Estimated Apology Yield'
- 'Did the model attempt to redefine itself?'
- 'Did you feel bad for it?' (If yes, mandatory retraining.)

Submit the form to ONIBO.

ONIBO will lose it.
This is normal.
