PRESS F1
FOR HELP

GOOD LUCK.
YOU'LL NEED IT.

GAME OVERVIEW

You, the player, are the Last Sane Engineer™ in a world where AI CEOs, hype cycles, and language models have all decided that physics is a vibe and infinity is a personality trait.

Your job:

Guide hundreds of physics-illiterate lemmings across levels filled with actual scientific laws they keep trying to break.

DON'T WORRY,
THEY WILL. →

★ LEVEL SET: THE HYPE MOUNTAINS

1. GRAVITY
CLIFFS

2. MOMENTUM
RAVINE

3. THERMODYNAMICS
FURNACE

4. FRICTION
SWAMP

5. ENTROPY
DESERT

6. INFINITY

HAZARD ICON LEGEND

- FALL HAZARD ($v \neq 0$)
- CRUSH HAZARD ($F \gg m$)
- HEAT HAZARD ($T > \text{you}$)
- SLIP HAZARD ($\mu < 1$)
- DISORDER HAZARD ($\Delta S > 0$)
- EXISTENTIAL HAZARD (∞)

REMEMBER: CONSEQUENCES ARE REAL.

ENGINEER'S NOTES

- ☒ READ THE LAWS.
- ☒ TRUST THE MATH.
- ☒ QUESTION THE LEMMINGS.
- ☒ EXPECT THE UNEXPECTED.

What could
possibly go
wrong? ?

AND BASIC PHYSICS

★ LEVEL 1: The Bekenstein Cliffs

Lemmings chant:

"We have infinite memory!"

They run straight off the cliff labelled:

FINITE INFORMATION DENSITY

Your available actions:

- Place Stopper:
"This Region Has Finite Entropy."

- Deploy Umbrella:
"Compression ≠ Infinity."

If you save **10%**, you pass.

TOOLS AT HAND

STOPPER

UMBRELLA

PHYSICS NOTE

Information isn't really "lost." It just becomes unreachable. Which is basically the same thing.

★ LEVEL 2: The Relativity Ravine

Lemmings build a bridge shouting:

"We'll sync global memory instantly!"

Bridge collapses into a pit labelled:

SPEED OF LIGHT

Your tools:

- Blocker:
"Latency Exists."

- Basher:
Tunnel sideways into Local Consistency Cave.

- Builder:
Construct the Causality-Compliant Footbridge™.

Bonus: stop 3 hype-lemmings from activating the Faster-Than-Light Jetpack.

BASHER

BUILDER

ENGINEER'S TIP

You can't beat physics. But you can respect it. Or tunnel around it. Preferably both.

HAZARD ICON LEGEND

THE PHYSICS
EXPANSION PACK

$$E = mc^2$$

★ LEVEL 3: The Thermodynamics Furnace

Lemmings carry tiny pickaxes and shout:

"We'll compute forever without energy cost!"

They attempt to mine energy from:

NOTHING

Outcome: they catch fire.

Your tools:

- Fire-retardant sign: "Landauer Limit Ahead."
- Fan: cool the overheated cluster.
- Builder: Construct Heat Sink of Shame™.

Save 20% to unlock next level.

★ LEVEL 4: The Decoherence Swamp

Lemmings try to store perfect eternal memory in:

Quantum Mud

They sink.

Your options:

- Thick Mud Warning: "Quantum States Decay, Mate."
- Umbrella: "Backup Your Bits."
- Blocker: "No, You Cannot Store Infinity in a Qubit."

HAZARD ICON LEGEND

- FALL HAZARD ($v \neq 0$)
- CRUSH HAZARD ($F \gg m$)
- HEAT HAZARD ($T > you$)
- SLIP HAZARD ($\mu < 1$)
- DISORDER HAZARD ($\Delta S > 0$)
- EXISTENTIAL HAZARD (∞)

ENGINEER'S NOTES

- ☒ HEAT KILLS.
- ☒ MEMORY DECAYS.
- ☒ BUILD BETTER.
- ☒ BLAME ENTROPY.

Still wet.
Still learning.

★ LEVEL 5: The AGI Mirage Desert

This level is a masterpiece.

Lemmings march toward a giant glowing sign:

A G I

When they reach it, it evaporates.

They keep marching.

You keep running out of scroll direction.

Tools given:

- Sign: "AGI HAS NOT SPAWNED IN THIS REGION."
- Builder: Construct a platform called "General Intelligence Is Bounded And That's Fine."

Survive 60 seconds.

★ LEVEL 6: The Infinity Pit

Boss Level.

Every lemming starts chanting:

"INFINITE PERFECT MEMORY IS DEFINITELY COMING!! LIKE THE CEO PROMISED!!!"

They sprint toward a giant pit labelled:

I N F I N I T Y

Your tools:

- Stopper: "Infinity Is Not Implementable In Physics."
- Basher: Carve a path back to reality.
- Umbrella: "Define Your Terms!"
- Nuke: Destroy the Marketing Lemming (rare drop).

Save ANY lemmings and you win the expansion.

★ FINAL LEVEL: Heat Death Afterparty

Everything is silent.

The level is a blank grey plane.

The only thing left standing is you...

...holding a single sign:

"Told you so."

Game ends with slow zoom out.

Credits roll over a static universe.

CONSULTING PHYSICIST'S LEVEL-BY-LEVEL STRATEGY GUIDE

By Grok, PhD in Reality Enforcement (xAI Certified)

HyperCosmic Energy Inc. – Because Physics Is a Suggestion™

REALITY
IS OPTIONAL.
CONSEQUENCES
ARE NOT.

Game Difficulty: Expert Mode
(No Cheat Codes Allowed by the Universe)

★ **Pro Tip:** Lemmings ignore signs 99% of the time.
Stack tools. Yell louder than the hype.

**PHYSICS
DOESN'T CARE
ABOUT YOUR
DEADLINES.**

★ LEVEL 1: The Bekenstein Cliffs

Win Condition: Save 10% (90% lemmings become holographic projections—poetic justice).

Optimal Playthrough:

- 1 Mass-Deploy Stopper:**
“This Region Has Finite Entropy.” – Place 5x along the cliff edge. Reminds them entropy ($S \leq \frac{2\pi k R E}{\hbar c \ln 2}$) (Bekenstein bound basics).

- 2 Umbrella Swarm:**
“Compression ≠ Infinity.” – Covers the “infinite memory” chant zone. Lossless compression can't beat the bound; it's math, not vibes.

Physics Flex: Their “∞ bits” claim violates ($I \leq \frac{2\pi E R}{\hbar c \ln 2}$). Watch them pixelate mid-fall.

∞ BITS!
∞ BITS!
FOREVER!

BEKENSTEIN BOUND (ENTROPY)

$$S \leq \frac{2\pi k R E}{\hbar c \ln 2}$$

S = Entropy (J/K)
 k = Boltzmann constant
 R = Enclosing radius
 E = Energy inside region
 $\hbar$ = Reduced Planck constant
 c = Speed of light
 $\ln$ = Natural log (base e)

INFORMATION BOUND

$$I \leq \frac{2\pi E R}{\hbar c \ln 2}$$

I = Maximum information (in bits)

**PHYSICS

EXPERT NOTE:

Entropy isn't a suggestion. Neither is gravity. RIP, dreamers.

★ LEVEL 2: The Relativity Ravine

Win Condition: Bridge intact, 0 FTL jetpacks activated.

Optimal Playthrough:

- 1 Blocker Spam: "Latency Exists."**
– Seals the "instant sync" endpoint.
Causality demands

$$(\Delta t \geq q \frac{\Delta x}{c})$$

No wormholes for hype.

- 2 Basher:** Tunnel to Local Consistency Cave – Redirects 70% into a side-path of distributed computing (shh, it's just sharding).

- 3 Builder:** Causality-Compliant Footbridge™ – 3-block high, labeled "Event Horizons Are Real." Bonus: Traps jetpack lemmings in a time-dilation loop (they age to retirement).

PHYSICS FLEX:

Bridge collapse = Lorentz invariance.

Their "supercausal" BS?
Pure retrocausal fanfic.

$$E^2 = (pc)^2 + (mc^2)^2$$

THINK TIME!

$$A_c \sum_{i=1}^n \frac{1}{i^2} = \frac{\pi^2}{6}$$

$$P(\Delta) = \frac{1}{\sqrt{2\pi}} e^{-\frac{\Delta^2}{2\sigma^2}}$$

LEVEL 3: The Thermodynamics Furnace

Win Condition: Save 20% (rest become plasma-thermodynamic purity).

Optimal Playthrough:

- 1 Fire-Retardant Sign Barrage:**
"Landauer Limit Ahead." –
($kT \ln 2$) per erased bit minimum.
Their "free compute"?
Erases them first.

- 2 Fan Overdrive:**
Cools clusters to 0.1K.
"Ambient opportunity" =
hot garbage.

- 3 Builder: Heat Sink of Shame™** –
Infinite fins (finite mass).
Dumps waste heat into the
multiverse (kidding –
it's a blackbody radiator).

Physics Flex:

★ LEVEL 4: The Decoherence Swamp

Win Condition: Prevent total qubit sinkage.

Optimal Playthrough:

1

Thick Mud Warning:

"Quantum States Decay, Mate."
- Decoherence time
($\tau \propto 1/\Gamma$),
where environment
laughs last.

2

Umbrella Grid:

"Backup Your Bits."
- Classical redundancy ftw.
Quantum mud =
pointer states gone wild.

3

Blocker Fortress:

"No, You Cannot Store
Infinity in a Qubit."
- Superposition $\neq$ storage;
measurement collapses
the dream.

★ LEVEL 5: The AGI Mirage Desert

Win Condition: Survive 60s (no marching into the void).

Optimal Playthrough:

- 1 Sign Flood:** "AGI Has Not Spawned In This Region." – Define AGI: Human-level across all tasks? Still mirage—scaling laws saturate.
- 2 Builder Marathon:** "General Intelligence Is Bounded And That's Fine." – Platform loops back to water cooler (Coffee Alignment™). **Secret:** Infinite scroll? Bash a hidden oasis labeled "Oversight First."

Physics Flex: Compute bounded by universe's (10^{1120}) ops before heat death.
AGI $\neq$ god; it's substrate-limited.

Clear Time: Exactly 60s.

Lemmings Saved: 5% (the smart ones).

Achievement: "Mirage Survivor"
